

Overview

HPE Solutions with Commvault

HPE Solutions with Commvault offer industry-leading data protection and data security capabilities that are proven to reduce the risks of threats, improve readiness, accelerate recovery, and rebuild applications rapidly & completely. With the broadest workload support across on-premises and cloud as well as powerful AI-assisted automation, HPE and Commvault enable continuous business through cyber resilience solutions built for cloud-first enterprises.

- Reduced deployment risk through tested & validated joint solutions, available through HPE Complete & HPE GreenLake
- Largest ecosystem of supported enterprise apps, DBs, OS, hypervisors, storages, big data, SaaS & cloud
- Tight integration with HPE storage & server portfolio:
 - Commvault IntelliSnap integration with HPE Alletra 5000, 6000, 9000, HPE Alletra dHCI, HPE XP 8, HPE GreenLake for Block Storage, automating snapshot management through the Commvault Console
 - Protect workloads on HPE HCI & dHCI, systems
 - Protects HPE Ezmeral, HPE GreenLake for Private Cloud Enterprise, HPE GreenLake for Private Cloud Business Edition,
 - Can write to disk, tape (HPE StoreEver) and cloud backup targets including HPE StoreOnce
 - Pair with Zerto to enhance overall security and DR capabilities

Hybrid Cloud Protection	Security	Commvault, HPE and Zerto
• Broad coverage: On-premises, SaaS and cloud-native workloads - protect any workload, from any generation, living in any location • Portability: Unique any-to-any portability; plus the ability to recover from anywhere to anywhere. • True, Cloud Platform: Run services on prem, in the cloud, as an appliance, or any mix of the three. Across any environment. • Cost efficiency: Optimize infrastructure to maintain and manage, saving admin time and storage costs. • Simple management: Single pane of glass management reduces overhead. The agility needed to keep up with the hybrid world. • Reliability: Leverage industry-leading trusted solutions.	• Fast Recovery: Trusted, rapid recovery. Eliminate downtime and exceed SLAs. • Unified Management: Visibility and control across the entire hybrid enterprise. Classify sensitive data. Eliminate blind spots. • Zero Trust: Strong authentication and micro-segmenting • Threat Prediction: Use AI to fight AI-driven attacks. Monitor activities, and anticipate risk. • Cleanroom Recovery: The only cyber resilience platform with the capability to ensure clean recovery • Cyber resilience: Secure and recover data from cyber attacks including ransomware, as you accelerate hybrid cloud adoption and modernize your business	• Protect all workloads, all tiers: Physical, virtualized, and containerized; databases, NAS, servers, cloud instances; mission-critical, business-critical, back office and test/dev • Deliver all SLAs: Customizable RPOs and RTOs of seconds, minutes, hours; tailor protection to each workload and application • Complete Data Protection: Commvault's backup & recovery across workloads with Zerto's business continuity & recovery for mission-critical workloads. • Best of breeds: Solutions available through HPE GreenLake, bringing the agility and flexibility of cloud, and security & performance of on-prem • Proactive detection: Scan for anomalous copies, set malware traps, and verify clean, secure copies • Stay Compliant: Full spectrum data protection to help agencies meet NIST RME SOX, HIPAA requirements

Benefits of HPE Solutions with Commvault and HPE

Overview

HPE GreenLake with Commvault

HPE GreenLake with Commvault is available as a consumption-based service offering that combines the simplicity, agility, and economics of public cloud with the security and performance benefits of an on-premises backup environment. It provides the following benefits:

- **Complete solution.** Commvault Data Protection through GreenLake includes all required hardware, software, which includes HPE Solutions with Commvault Backup and Recovery), and services to deliver an end-to-end solution, eliminating the challenges of backup capacity planning, provisioning, and billing.
- **Simplified metering.** Consumption is based on front-end terabytes (FET) metering. Simply determine the amount of data to be protected, freeing you from worrying about the number of copies that will be kept. This allows you to predictably control backup costs.
- **Improved time to market.** HPE creates a local buffer of backup resources beyond what is needed now. The extra capacity is deployed ahead of any oncoming demand and ready to be activated when needed.
- **HPE Solutions with Commvault HyperScale™ X** integration with HPE storage enables modern scale out storage options for cost optimization and cloud economics on-premises and for optimized hybrid cloud.

Commvault® Cloud, powered by Metallic® AI, SaaS solution

Commvault® Cloud, powered by Metallic® AI, offers trusted data security protection for your SaaS app data and more. It is purpose-built to enable cyber recovery in the hybrid world, providing the highest security, intelligence, and recovery speed. With Commvault Cloud, customers can secure their data, predict risks, minimize damage, and quickly recover from any threat:

- Comprehensive coverage from edge to cloud
- Protection of SaaS applications, endpoints, databases, Active Directory, hybrid cloud environments, file systems, containers, MS Office 365, Salesforce and more
- Truly turnkey -- rapid deployment to get you up-and-running in minutes
- Enhanced cyber resiliency with Protect, Detect, Recover approach to cyber attacks
 - Immutable, separated data copies preventing tempering, altering or deletion of data
 - Built-in anomaly detection and early warning into threats with Commvault Cloud ThreatWise™

Clean data and recovery readiness through Commvault Cloud Cleanroom Recovery, offering rapid and clean recovery when it matters the most

FedRAMP High Authorized

Commvault Cloud SaaS-delivered solutions, from HPE Solutions with Commvault, are now a FEDRAMP High Authorized data protection offerings. This certification signifies that Commvault Cloud for Government can securely handle the most sensitive, controlled unclassified information (CUI) in cloud computing environments for government agencies and contractors, providing unmatched data protection and cyber resilience.

- These dedicated solutions are designed to meet the unique needs of federal agencies and are hosted exclusively using government cloud deployment models, which are also compliant with U.S. government and federal regulations.
- FedRAMP High approval represents the highest level of data protection and cyber resilience, helping to ensure the critical data remains secure and available in the face of evolving cyber threats.

Overview

HPE Complete- Resell of Third Party Branded Products

Benefits

- One Stop Shop - Purchase complete solutions from HPE that include best in class third-party branded products, all on a single HPE purchase order.
- Validated Solution - Confidence of the HPE interop assurance validation for third party branded products that complement HPE Storage and Server solutions.
- Customer Experience - HPE Complete utilizes third-party expertise for installation, support, and warranty of their products. However, HPE Complete will step in to facilitate third-party issue resolution when needed to assist in overall customer satisfaction. HPE products that are part of the overall solution are supported per HPE Services and support purchased. For Commvault, HPE Services offers Deployment and Consulting Services.
- Unique Value – Minimize risk, complexity and cost when deploying multi-vendor products and technologies into the HPE ecosystem. Many solutions come with custom HPE/Partner configuration and integration guides and tools.

Models

Hewlett Packard Enterprise is making the following HPE Solutions with Commvault SKUs available via HPE Complete:

Notes: All Subscription SKUs include HPE Solutions with Commvault Premium 24X7 support

HPE Solutions with Commvault Complete™ Data Protection for Non-Virtual and File per TB

Description	SKU
Commvault Data Protection for Non-virtual and File per Front End TB 1-year Subscription E-LTU	R6Y75AAE
Commvault Data Protection for Non-virtual and File per Front End TB 3-year Subscription E-LTU	R6Y76AAE
Commvault Data Protection for Non-virtual and File per Front End TB 5-year Subscription E-LTU	R6Y77AAE
Commvault Data Protection for Non-virtual and File per Front End TB Perpetual E-LTU	R6Y74AAE
Commvault Data Protection for Non-virtual and File per Front End TB 1-month Maintenance	R6Y78AAE

HPE Solutions with Commvault Complete™ Data Protection for Virtual Machines per VM 10-packs

Commvault Data Protection for Virtual Machines per VM 10-pack 1-year Subscription E-LTU	R6Y80AAE
Commvault Data Protection for Virtual Machines per VM 10-pack 3-year Subscription E-LTU	R6Y81AAE
Commvault Data Protection for Virtual Machines per VM 10-pack 5-year Subscription E-LTU	R6Y82AAE
Commvault Data Protection for Virtual Machines per VM 10-pack Perpetual E-LTU	R6Y79AAE
Commvault Data Protection for Virtual Machines per VM 10-pack 1-month Maintenance	R6Y83AAE

HPE Solutions with Commvault Backup and Recovery for Non-Virtual and File per TB

Commvault Backup and Recovery for Non-virtual and File per Front End TB 1-year Subscription E-LTU	R6Y60AAE
Commvault Backup and Recovery for Non-virtual and File per Front End TB 3-year Subscription E-LTU	R6Y61AAE
Commvault Backup and Recovery for Non-virtual and File per Front End TB 5-year Subscription E-LTU	R6Y62AAE
Commvault Backup and Recovery for Non-virtual and File per Front End TB Perpetual E-LTU	R6Y59AAE
Commvault Backup and Recovery for Non-virtual and File per Front End TB 1-month Maintenance	R6Y63AAE

HPE Solutions with Commvault Backup and Recovery for Non-Virtual and File per OI

Commvault Backup and Recovery for Non-virtual and File per Operating Instance 1yr Subscription E-LTU	R6Y50AAE
Commvault Backup and Recovery for Non-virtual and File per Operating Instance 3yr Subscription E-LTU	R6Y51AAE
Commvault Backup and Recovery for Non-virtual and File per Operating Instance 5yr Subscription E-LTU	R6Y52AAE
Commvault Backup and Recovery for Non-virtual and File per Operating Instance Perpetual E-LTU	R6Y49AAE
Commvault Backup and Recovery for Non-virtual and File per Operating Instance 1-month Maintenance	R6Y53AAE

HPE Solutions with Commvault Backup and Recovery for Non-Virtual File and Object Data per TB

Description

SKU

Commvault Backup and Recovery for Non-virtual File and Object Data per Front End TB 1-year E-LTU	R8D42AAE
Commvault Backup and Recovery for Non-virtual File and Object Data per Front End TB 3-year E-LTU	R8D43AAE
Commvault Backup and Recovery for Non-virtual File and Object Data per Front End TB 5-year E-LTU	R8D44AAE
Commvault Backup and Recovery for Non-virtual File and Object Data per Front End TB Perpetual E-LTU	R8D41AAE
Commvault Backup and Recovery for Non-virtual File and Object Data per Front End TB 1mo Maintenance	R8D45AAE

HPE Solutions with Commvault Backup and Recovery for Virtual Machines per VM 10-packs

Commvault Backup and Recovery for Virtual Machines per VM 10-pack 1-year Subscription E-LTU	R6Y70AAE
Commvault Backup and Recovery for Virtual Machines per VM 10-pack 3-year Subscription E-LTU	R6Y71AAE
Commvault Backup and Recovery for Virtual Machines per VM 10-pack 5-year Subscription E-LTU	R6Y72AAE
Commvault Backup and Recovery for Virtual Machines per VM 10-pack Perpetual E-LTU	R6Y69AAE
Commvault Backup and Recovery for Virtual Machines per VM 10-pack 1-month Maintenance	R6Y73AAE

HPE Solutions with Commvault Backup and Recovery for Mail and Cloud Applications per User

Commvault Backup and Recovery for Mail and Cloud Applications per User 1-year Subscription E-LTU	R6Y65AAE
Commvault Backup and Recovery for Mail and Cloud Applications per User 3-year Subscription E-LTU	R6Y66AAE
Commvault Backup and Recovery for Mail and Cloud Applications per User 5-year Subscription E-LTU	R6Y67AAE
Commvault Backup and Recovery for Mail and Cloud Applications per User Perpetual E-LTU	R6Y64AAE
Commvault Backup and Recovery for Mail and Cloud Applications per User 1-month Maintenance	R6Y68AAE

HPE Solutions with Commvault Backup and Recovery for Endpoints per User

Commvault Backup and Recovery for Endpoint Users per User 1-year Subscription E-LTU	R6Y55AAE
Commvault Backup and Recovery for Endpoint Users per User 3-year Subscription E-LTU	R6Y56AAE
Commvault Backup and Recovery for Endpoint Users per User 5-year Subscription E-LTU	R6Y57AAE
Commvault Backup and Recovery for Endpoint Users per User Perpetual E-LTU	R6Y54AAE
Commvault Backup and Recovery for Endpoint Users per User 1-month Maintenance	R6Y58AAE

HPE Solutions with Commvault Backup and Recovery for Active Directory points per User

Commvault Cloud Backup and Recovery for Active Directory per User 1-year Subscription E-LTU	S4M60AAE
Commvault Cloud Backup and Recovery for Active Directory per User 3-year Subscription E-LTU	S4M61AAE
Commvault Cloud Backup and Recovery for Active Directory per User 5-year Subscription E-LTU	S4M62AAE
Commvault Cloud Backup and Recovery for Active Directory per User Perpetual E-LTU	S4M59AAE
Commvault Cloud Backup and Recovery for Active Directory per User 1-month Maintenance	S4M63AAE

HPE Solutions with Commvault Disaster Recovery for Non-Virtual and File per TB

Commvault Disaster Recovery for Non-virtual and File per Front End TB 1-year Subscription E-LTU	R6Y85AAE
Commvault Disaster Recovery for Non-virtual and File per Front End TB 3-year Subscription E-LTU	R6Y86AAE
Commvault Disaster Recovery for Non-virtual and File per Front End TB 5-year Subscription E-LTU	R6Y87AAE
Commvault Disaster Recovery for Non-virtual and File per Front End TB Perpetual E-LTU	R6Y84AAE
Commvault Disaster Recovery for Non-virtual and File per Front End TB 1-month Maintenance	R6Y88AAE

HPE Solutions with Commvault Disaster Recovery for Virtual Machines per VM 10-packs

Commvault Disaster Recovery for Virtual Machines per VM 10-pack 1-year Subscription E-LTU	R6Y90AAE
Commvault Disaster Recovery for Virtual Machines per VM 10-pack 3-year Subscription E-LTU	R6Y91AAE
Commvault Disaster Recovery for Virtual Machines per VM 10-pack 5-year Subscription E-LTU	R6Y92AAE
Commvault Disaster Recovery for Virtual Machines per VM 10-pack Perpetual E-LTU	R6Y89AAE
Commvault Disaster Recovery for Virtual Machines per VM 10-pack 1-month Maintenance	R6Y93AAE

Standard Features

HPE Solutions with Commvault

Products and solutions include: HPE Solutions with Commvault Complete™ Data Protection, HPE Solutions with Commvault Backup and Recovery, HPE Solutions with Commvault Disaster Recovery, HPE Solutions with Commvault HyperScale™ X Technology, and HPE Solutions with Commvault Activate™. Each product line carries with it a specific set of features and benefits that align to the customer value it provides.

HPE Solutions with Commvault Complete™ Data Protection

HPE Solutions with Commvault Complete™ Data Protection helps ensure data availability and business continuity across both your on-premises and cloud environments. It provides simple, scalable backup, replication and disaster recovery orchestration for all your workloads. It combines the features of HPE Solutions with Commvault Backup & Recovery and HPE Solutions with Commvault Disaster Recovery to provide robust enterprise-grade data protection and recovery for your entire IT infrastructure – from legacy applications to containers and cloud-native workloads. And it's all easily managed through an intuitive, web-based user interface with role-based access control, freeing-up your IT staff to focus on higher-value activities. It is a complete solution that:

- Delivers edge to cloud intelligent data services, providing end-to-end data protection
 - Protects and recovers from cyber threats including ransomware, leveraging AI-based anomaly detection to identify suspicious activities, and automated copy management with integration into HPE storage
 - Simplifies the journey to cloud and effectively manages data across hybrid and multi-cloud environment
-

HPE Solutions with Commvault Complete Data Protection Plus (CDP+)

HPE Solutions with CDP+ are the next-generation data protection solutions purpose-built to protect customer data across all hybrid workloads, at the best TCO. These unified solutions help secure, defend and recover data across production and backup environments. The solutions offer:

- Multi-layer, proactive data protection that allows customers to take action sooner when it comes to preventing data loss
 - Unparallel visibility to uncover vulnerabilities and classify sensitive information effortlessly; proactive protection of backup data against malware threats
 - Auto and disaster recovery
 - Data availability and business continuity across customer's IT environment – all managed from one unified platform
-

HPE Solutions with Commvault Backup and Recovery

HPE Solutions with Commvault Backup & Recovery provides enterprise-grade protection and recovery of virtual machines, containers, databases, applications, files and endpoints, with a single view for managing your entire environment. HPE Solutions with Commvault allows you to manage backed-up data and workloads efficiently and securely, both on-premises and in any public cloud. It provides

- Increased visibility and role-based access control that enables self-service, restricting unauthorized access while helping to eliminate data sprawl.
 - HPE Solutions with Commvault's market-tested technology helps organizations extract more business value from that data to facilitate business planning and to improve business outcomes.
 - Best-in-class flexibility, scalability and protection for the data – regardless of where it resides.
-

HPE Solutions with Commvault Disaster Recovery

As the number and types of your workloads increase – the cloud, VMs, containers, applications, databases and endpoints – so too does the complexity of protecting and managing it all. HPE Solutions with Commvault Disaster Recovery is a simplified, flexible and scalable solution that provides DR automation, replication and cost-optimized cloud data mobility. With multi-cloud integration, one-click failover, multi-tenancy support, live replication and intuitive reporting, HPE Solutions with Commvault enables you to protect and recover your entire data environment, wherever it resides.

- Ensures data and application availability and mitigates cyber threats
 - Automated compliance reporting
 - Verifiable recovery via copy data management
-

Standard Features

HPE Solutions with Commvault Cloud Risk Analysis

Risk Analysis provides organizations with a better way of securing and defending data by easily identifying and categorizing sensitive data, in order to proactively defend and reduce the impact of a data breach. Risk Analysis delivers a robust and configurable platform that's capable of analyzing both backup and live data. Customers can effortlessly secure and defend sensitive data across their entire infrastructure. They can also gain visibility into data risks, easily identify and categorize sensitive data and mitigate potential data breaches, all while saving costs through smart proactive data management strategies.

HPE Solutions with Commvault Cloud Threat Scan

Threat Scan helps customers to securely recover their data as quickly as possible by identifying the last known clean copies and to avoid any potential reinfection by accidentally restoring malicious files. Threat Scan examines backup content files and network share filesystem backups for malware infection using a built-in, signature-based scanning engine. Threat scan quickly identifies what backup data is corrupted, encrypted, or has heavily changed, giving IT an early warning when attacks occur.

HPE Solutions with Commvault Cloud ThreatWise

Early warning cyber deception solution that surfaces zero-day, unknown, and internal threats in production – before they reach your data.

- Authentic decoys that mimic and behave like legitimate assets and highly specialized resources
 - Automated intelligence to maximize decoy placement and reduced cognitive load
 - Precise alerts to pinpoint threats early, without false positives or alert fatigue
 - Robust integrations across security tools and backup environments
 - Simple SaaS delivery with flexible, lightweight architecture and rapid scalability
-

HPE Solutions with Commvault Cloud Air Gap Protect

Commvault Cloud leverages a hardened, multi-layered approach to ransomware readiness, providing robust controls to prevent threats and ensure data is highly available and recoverable from cyberattack. With immutable, air-gapped data copies, advanced anomaly detection, and built-in encryption, Commvault Cloud comprehensively safeguards critical data across apps, endpoints, on-prem, and cloud environments. Built on Microsoft Azure, Commvault Cloud offers industry-leading durability, security, scalability, and performance, capable of protecting business data from today's and tomorrow's cyberthreats. Air Gap Protect is a fully managed cloud storage target, offering ultimate security and scale to let organizations seamlessly adopt cloud storage. Available with Backup and Recovery, as well as with the SaaS hybrid cloud portfolio, Air Gap Protect makes it simple to adopt cloud storage—without a steep learning curve and for air-gapped ransomware protection and optimized costs.

HPE Solutions with Commvault Cloud Air Gap Protect

Commvault Cloud Air Gap Protect delivers secure, air-gapped cloud storage for data backups. When deployed with Commvault SaaS hybrid cloud offerings, customers can get streamlined single vendor management with no need for additional cloud skills and expertise. It delivers simplified cyber resilience with pre-configured networking and storage, reduced costs via efficient deduplication and ransomware mitigation with secure air-gapped cloud data protection.

Solution Packaging

Commvault Cloud Autonomous Recovery: Autonomous Recovery reduces recovery time, downtime, and costs by bringing AI-driven automation and validation to basic foundational protection (which includes Backup and recovery, Unified management, Reporting and security insights based on security features such as Zero Trust Architecture, immutability, encryption, AI-driven insights and anomaly detection). Designed for automated disaster and cyber recovery use cases, Autonomous Recovery provides continuous replication and automated failover to ensure data is always available by replicating it to a secondary site. In case of a data incident, organizations can automatically failover applications to the secondary site, so business can continue running without interruption. It includes the foundational protection package plus:

- Automated disaster and cyber recovery
- Validate application recovery

Standard Features

Commvault Cloud Cyber Resilience: Cyber Resilience includes the fullest set of Commvault Cloud capabilities. Building on Foundational and Autonomous Recovery Solutions, Cyber Resilience adds security posture capabilities helping organizations scan for risks, find and categorize sensitive data, and remediate issues. Additionally, Cyber Resilience includes threat scanning to identify threats within backup data, as well as cyber deception and threat detection to provide early warning of attacks, so organizations can minimize the blast radius and impact of attacks, while ensuring the fastest recovery after a cyber incident. It includes autonomous package plus:

- Threat scanning
- Data discovery and compliance
- Data security posture remediation
- AI-driven threat detection
- Cyber deception and early warnings

Commvault Cloud Cleanroom Recovery: Cleanroom Recovery is a comprehensive testing and failover offering (a service running on Commvault Cloud, not a product or a platform) that enables organizations to mitigate cyber risk effectively. It provides a safe and isolated environment for

- Testing cyber recovery plans,
- Conducting forensic analysis, and
- Helping to ensure business continuity in the event of a breach.

Cleanroom Recovery is an offering for both software and SaaS customers. Cleanroom Recovery facilitates automated recovery of the control plane, integration with a tertiary copy of data in Air-gap Protect, and a streamlined, easy-to-use recovery wizard. This will provide the ability for clean and easy restores in a new uncontaminated Microsoft Azure tenant.

HPE Solutions with Commvault HyperScale™ X Technology

HyperScale X is an intuitive and easy to deploy, scale-out solution that is fully integrated with HPE Solutions with Commvault's intelligent data management platform. It provides unmatched scalability, security, and resiliency to accelerate an organization's digital transformation journey as they move to hybrid cloud, container, and virtualized environments. Its flexible architecture allows you to get up and running quickly and grow as your needs demand.

HPE Solutions with Commvault HyperScale™ X Technology is available as a reference design using HPE Apollo or HPE ProLiant servers. It provides

- A modern data protection and management platform to enable cloud-like agility, resiliency and availability, improved hardware utilization and optimized costs;
- End-user efficiency with automation and self-service capabilities, and seamless storage scalability without forklift upgrades.
- A true scale-out appliance, scalable by a single node, with innovative distributed storage platform.

Commvault Cloud Backup and Recovery for Microsoft 365

Comprehensive protection for productivity data in M365 – proven to safeguard businesses from deletion, corruption and attack, all with the simplicity of SaaS. The solution offers everything customers need to protect M365 –

- Automated backups: Hassle-free backups with extended storage and retention built-in
 - Source-side data isolation: Air-gapped protection for data separated from production environments
 - Fast, flexible recovery: Granular recoverability with point-in-time, in/out-of-place, item-level, self-service restore options
 - Robust coverage: Comprehensive protection of commercial, GCC and GCC High M365 environments
 - Multi-layered security: Zero trust controls, encrypted & immutable data copies, & advanced security protocols
 - Compliance: Fast and precise searching and preservation of data for regulatory compliance
-

Standard Features

Commvault Cloud Endpoint Backup and Recovery

Safeguards hybrid and remote workforce with fast and secure endpoint protection, ensuring data stays resilient and recoverable from user deletion, corruption and ransomware attack.

Feature	Benefits
Automated regular backups with extended storage built in	Mitigates data loss
Ability to provide an airgap, e.g. backup data isolation via limiting exposure to storage	Data isolation, ransomware risk mitigation
Flexible restore options – point in time, granular restores, out-of-place restores	Reduces downtime, accelerates recovery, get what you need
Secure laptop data with encryption, secure erase, geo-location & remote wipe functions	Prevents unauthorized access, data loss prevention
Easily add laptops as your business grows – from 100s to 1000s	Provides scalability & easy and silent deployment
Anomaly detection capabilities	Risk mitigation
Dashboard and integrated console for easy management and flexible deployment options	Backup environment management efficiency

Service and Support

Service and Support for HPE Solutions with Commvault products

Are provided directly by HPE Solutions with Commvault. For any support and generic queries please visit the HPE Solutions with Commvault customer support portal at <https://ma.HPE Solutions with Commvault.com>. HPE Solutions with Commvault's customer support organization will be responsible for responding to and working with customers. Support request will be processed by HPE Solutions with Commvault in accordance with its support policies which can be found at <https://ma.HPE Solutions with Commvault.com/Content/pdf/HPE Solutions with Commvault-Support-Terms.pdf>.

HPE Solutions with Commvault Premium Support

Premium Support provides all of the coverage of standard support, but expands the window of coverage to 24x7x365. It is designed to address the needs of many enterprises with mission-critical data management environments. The Premium Support option includes access to:

- HPE Solutions with Commvault's Customer Support Center (anytime, including holidays)
- The HPE Solutions with Commvault Maintenance Advantage self-help website, on a 24x7 basis
- Critical software updates, product enhancements, and new release notifications
- e-Support Platforms including Incident Management, Knowledge Database, HPE Solutions with Commvault Documentation, and HPE Solutions with Commvault Forums
- Support Account History Reports, provided upon request

HPE Solutions with Commvault Enterprise Success Support

HPE Solutions with Commvault's Enterprise Success is designed for those enterprise customers looking to gain improved business value from their HPE Solutions with Commvault deployment, and help ensure full confidence that their data management environment will deliver when it's needed most. Starting from a foundation based on HPE Solutions with Commvault Premium Support, Enterprise Success personalizes the customer experience by adding a team of shared **technical account managers** (TAMs) and support account managers (SAMs), each bringing years of technological and domain expertise to bear on your data management environment. They partner closely with your internal team to fully understand your business and operational goals, and work to help ensure that those goals are met. This team utilizes predictive monitoring and analytic tools, advanced reporting capabilities, flexible services credit, and proactive business and technical reviews that help to identify trends and opportunities, and enable them to continually optimize your data management investment. HPE Solutions with Commvault Enterprise Success includes:

- HPE Solutions with Commvault's Customer Support Center (anytime, including holidays)
- The HPE Solutions with Commvault Maintenance Advantage self-help website, on a 24x7 basis
- Critical software updates, product enhancements, and new release notifications¹
- e-Support Platforms including Incident Management, Knowledge Database, HPE Solutions with Commvault Documentation, and the HPE Solutions with Commvault Community
- Support Account History Reports, provided upon request
- Technical Account Manager
- Support Account Manager
- A Professional Services Credit that can be applied to HPE Solutions with Commvault Consulting Services; Professional Services; Education Services; a Resident Support Engineer; HPE Solutions with Commvault Software Personalization engagements; Wellness Assessments; and many other HPE Solutions with Commvault Consulting Services Offerings.
- Quarterly Business and/or Strategic Reviews
- Quarterly HPE Solutions with Commvault Health Checks
- HPE Solutions with Commvault Support Analytics Tools
- Enhanced Service Level Agreements for Severity "O" issues

Service and Support

HPE Solutions with Commvault Enterprise Guided Success SAM

An enhanced Commvault Success offering that includes all the benefits of Premium Support and additional value-added services associated with mission critical data management operations. This service is proactive and includes:

- A named Success Account Management Service (SAM), this service team:
 - Monitors open issues to ensure there is continued activity towards prompt resolution
 - Communicates directly with customer management to update and prioritize on high severity issues
 - Directs issue escalation to ensure continued ownership
- Accelerated Service Level Objectives (Additional details in section 2.2.9)
- Monthly Technical Reviews with the Success Account Manager
- Escalated Critical Ticket Management – work with development directly on critical issues which are affecting business operations

HPE Solutions with Commvault Enterprise Guided Success TAM

An enhanced Commvault Success offering that allows the customer to have a localized resource (onsite and remote) who aligns a strategic business plan with a customer's business objective and the technology to accomplish those objectives. This proactive service includes:

- A named Technical Account Management Service (TAM), assigned with a 1:5 ratio (1 TAM per 5 customers)
 - A strategic advisor and consultant
 - Onsite/remote presence with the customer (to be scheduled with the TAM, max number of days as per fraction purchased, dependent on agreed requirements)
 - Onsite trips are limited per customer
- Fulfill the role of “voice of the customer” in Commvault meetings, and the technical “voice of Commvault” in the customer meetings
- Identify risks in the environment as it relates to data management operations
- Help executing the technical business plan in accordance with customer policies and procedures

HPE Solutions with Commvault Enterprise Elite Success

This tier is designed to provide strategic world class technical management for all aspects of customers' Enterprise Data Management solution. We partner fully with our customers to enable success, and to provide business stakeholders with the highest level of customer satisfaction, all while safeguarding technology investments and intellectual property.

Severity Level Objectives (SLO)

- Accelerated Service Level Objectives
- Severity 0 (Zero) designed to support Enterprise Data Centers

Support Account / Technical Account Manager (SAM /TAM) Roles

The Elite Success Tier is a joint collaboration with the Success Account Manager (SAM) and Technical Account Manager (TAM). The following are the roles and responsibilities for each under the ESP to ensure continued success:

Success Account Manager (SAM) Role: The SAM works to ensure Service Level Objective success, provide reporting, and manage escalation and critical care instances.

- Single point of contact owning the overall support experience
- Communicate proactive monitoring metrics to customer, including if thresholds met or exceeded and the potential impact on the business
- Overall management of support status – includes all tickets and metrics associated with ticket history
- Deliver Quarterly Business Reviews – metrics/business reviews
- Working with the customer to understand the business requirements and stated Service Level Objectives (Reviewed for both Commvault and customer's internal SLOs to ensure they are achievable metrics for success)
- Generation and Review of support ticket history and analysis during the Quarterly Business Reviews

Service and Support

- Business Reviews – Executive and/or Technical. Work with TAM on strategic agenda
- Work closely with the TAM for any onsite technical requirements/assistance
- Work closely with the TAM to identify training opportunities for customer personnel

Technical Account Manager (TAM) Role: The Elite Success Tier includes assignment of a TAM (20% percent coverage) to partner with our customers to understand the customer's business objectives. The TAM provides proactive and reactive guidance to mitigate risk and reduce time to resolution by aligning key technologies and resources to those objectives.

- Fulfill the role of "voice of the customer" in Commvault meetings, and the technical "voice of Commvault" in customer meetings (ongoing)
- Identify risks in the environment as it relates to data management operations
- Help executing the technical business plan in accordance with customer policies and procedures
- Fractional TAM Options (20%): Onsite/Remote presence with the customer (to be scheduled with the TAM, max number of days as per fraction purchased, dependent on agreed requirements)
- Dedicated TAM Option: Full time technical consultant to ensure the operational stability and value realization of your Commvault environment
- Work in tandem with the SAM on any support needs

HPE Solutions with Commvault Enterprise Elite Success Plus

The Elite Success Plus tier builds on the Elite Success tier, however it includes a TAM at a 1:2 ratio so 50% of a TAM's time.

Metallic Support

Access Metallic Customer Support via chat, phone, or by submitting a customer support case via the Metallic Hub. Live agents are available 24/5 and Critical support is available 24/7.

Metallic Customer Support SLAs response targets to cases under the Metallic offering will be based on the assigned priority level, ranging from Critical priority (1 hour response target) to Low priority (24 hour response target). For more information on Metallic support, visit: <https://metallic.io/support>

Warranty

With the exception of products provided for beta, demonstration, test or evaluation purposes or that is labeled "Not for Resale", HPE Solutions with Commvault warrants that the products licensed hereunder shall be new and shall operate substantially in accordance with its user documentation for a period of ninety (90) days from the date of shipment by HPE Solutions with Commvault or its licensors (hereinafter the "Warranty Period"). If, during the Warranty Period, any product is defective, HPE Solutions with Commvault's sole liability, and the customer's sole remedy, shall be, at HPE Solutions with Commvault's option, (i) repair or replacement of the product which does not comply with this warranty, or (ii) return of the amount paid for the product which does not comply with the warranty.

See other Warranty Limitations and Restrictions below. This warranty is subject to the more complete description of the warranty for the HPE Solutions with Commvault products which can be found in the End User License and Limited Warranty Agreement. Nothing in this warranty is intended to exclude, restrict or modify any rights that a customer may have under any applicable legislation, which may not be excluded, restricted or modified by agreement.

Return Policy for Resellers

The purchase of HPE Solutions with Commvault products is final and non-refundable. Stocking of HPE Solutions with Commvault products is not recommended. Please purchase accurate quantities required to fulfill the customer order.

Service and Support

Limitations and Restrictions

The terms of the warranty are limited to the remedies as set forth in this warranty. This warranty is provided in lieu of all other rights, conditions and warranties, express or implied, in fact or by operation of law. HPE Solutions with Commvault makes no other express or implied warranty with respect to the software, hardware, other products, services, documentation or HPE Solutions with Commvault support, including, without limitation, any warranty of merchantability, fitness for a particular purpose lack of viruses and non-infringement of third party rights. HPE Solutions with Commvault does not warrant that any products will operate uninterrupted or be error-free, or that any defects that may exist in its products can be corrected.

In no event shall HPE Solutions with Commvault, or its licensors, be liable for cost of procurement of substitute products or services, lost profits or any other special, indirect, consequential or incidental damages (including but not limited to lost information or data), however caused whether or not HPE Solutions with Commvault has been advised of the possibility of such damages. Some jurisdictions do not allow limitation or exclusion of liability for consequential or incidental damages, so that limitation or exclusion may not apply. In the event that HPE Solutions with Commvault, or its licensors, are subject to any liability in connection with the products or services, for any reason whatsoever, their liability shall not exceed the amount paid by the customer for the products or services, respectively, which gave rise to the liability. This limitation shall apply even if HPE Solutions with Commvault has been advised of the possibility of such damages.

HPE Services

No matter where you are in your digital transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

<https://www.hpe.com/services>

Consulting Services

No matter where you are in your journey to hybrid cloud, experts can help you map out your next steps. From determining what workloads should live where, to handling governance and compliance, to managing costs, our experts can help you optimize your operations.

<https://www.hpe.com/services/consulting>

HPE Managed Services

HPE runs your IT operations, providing services that monitor, operate, and optimize your infrastructure and applications, delivered consistently and globally to give you unified control and let you focus on innovation.

[HPE Managed Services | HPE](#)

Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources. Meet service-level targets and business objectives with features designed to drive better business outcomes.

<https://www.hpe.com/services/operational>

HPE Complete Care Service

HPE Complete Care Service is a modular, edge-to-cloud IT environment service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals through a personalized experience. All delivered by an assigned team of HPE Services experts. HPE Complete Care Service provides:

- A complete coverage approach -- edge to cloud
- An assigned HPE team
- Modular and fully personalized engagement
- Enhanced Incident Management experience with priority access
- Digitally enabled and AI driven customer experience

Configuration Information

Configuration

HPE Solutions with Commvault via HPE Complete configurations are as follows: (HPE Solutions with Commvault standard Backup & Recovery License options and solutions are listed in steps 1 to 26, while the Metallic Backup as a service options are listed in step 27)

Select HPE Solutions with Commvault Licenses and Services (Step number)

- Complete™ Data Protection for Non-Virtual and File per TB Subscriptions (1a) or Perpetual (1b and 1c)
- Data Protection Plus for Non-Virtual and File per TB Subscriptions (2a) or Perpetual (2b and 2c)
- Complete™ Data Protection for Virtual Machines per VM 10-pack Subscriptions (3a) or Perpetual (3b and 3c)
- Data Protection Plus for Virtual Machines per VM 10-pack Subscriptions (4a) or Perpetual (4b and 4c)
- Backup and Recovery for Non-Virtual and File per TB Subscriptions (5a) or Perpetual (5b and 5c)
- Backup and Recovery for Non-Virtual and File per OL Subscriptions (6a) or Perpetual (6b and 6c)
- Backup and Recovery for Non-Virtual File and Object Data per TB Subscriptions (7a) or Perpetual (7b and 7c)
- Backup and Recovery for Virtual Machines per VM 10-pack Subscriptions (8a) or Perpetual (8b and 8c)
- Backup and Recovery for Mail and Cloud Applications per User Subscriptions (9a) or Perpetual (9b and 9c)
- Backup and Recovery for Endpoints per User Subscriptions (10a) or Perpetual (10b and 10c)
- Backup and Recovery for Active Directory per User Subscriptions (11) or Perpetual (11b and 11c)
- Disaster Recovery for Non-Virtual and File per TB Subscriptions (12a) or Perpetual (12b and 12c)
- Disaster Recovery for Virtual Machines per VM 10-pack Subscriptions (13a) or Perpetual (13b and 13c)
- eDiscovery for Non-Virtual and File per TB Subscriptions (14a) or Perpetual (14b and 14c)
- eDiscovery for Virtual Machines per VM 10-pack Subscriptions (15a) or Perpetual (15b and 15c)
- eDiscovery for Mail and Cloud Applications per User Subscriptions (16a) or Perpetual (16b and 16c)
- eDiscovery for Endpoints per User Subscriptions (17a) or Perpetual (17b and 17c)
- Risk Analysis (18a), Threat Scan (18b), Security Bundle (18c) Subscriptions or Perpetual
- Autonomous Recovery for Unstructured Data Subscriptions (19)
- Cyber Resilience for Unstructured Data Subscriptions (20)
- Air-Gap Protect Subscriptions (21)
- Cleanroom Recovery Subscriptions (22)
- HyperScale™ X Reference Architecture 4-drive Node Subscriptions (23a) or Perpetual (23b and 23c)
- HyperScale™ X Reference Architecture 12-drive Node Subscriptions (24a) or Perpetual (24b and 24c)
- HyperScale™ X Reference Architecture 24-drive Node Subscriptions (25a) or Perpetual (25b and 25c)
- HPE Solutions with Commvault and HPE Professional Services and Training (26a, 26b and 26c)
- HPE Solutions with Commvault Enterprise Support (27a), Perpetual Renewal Support (27b), Enterprise Success (27c)
- Choose HPE Server Nodes (28)
- HPE Solutions with Commvault Metallic Backup as a service (29a to 29q)

Notes:

- OL Licensing will be capped at 500GB. When a protected operating instance exceeds 500GB, an additional OL license will be consumed for every additional 500GB protected on that server, NAS, or file repository.
- The HPE Solutions with Commvault Metallic for FedRAMP offerings are available via the HPE Ordering (OCA) tool and require an approval for quoting and ordering. The approval is required to verify that these products are being sold to a US Fed account only.

Configuration Information

Step 1 – Complete Data Protection for Non-Virtual and File per TB

HPE Solutions with Commvault Complete Data Protection for Non-Virtual and File per front-end terabyte consists of all the software required to conduct backup and recovery activities, as well as automated Disaster Recovery operations on non-virtualized systems, such as physical Application or File servers, NAS Devices, and Cloud File repositories, with additional features included for archive, operational reporting, and hardware snapshot management, commonly known as HPE Solutions with Commvault IntelliSnap® technology. Does not include Mailbox Granular Level backup/archive or Endpoint Protection, which must be added on a per-user license basis.

Step 1a – Complete Data Protection for Non-Virtual and File per TB Subscriptions

1, 3 & 5 Year Subscription Licenses; pricing listed for total term of the subscription; can be renewed at the end of the commitment period.

Notes: Subscription LTUs include 24X7 HPE Solutions with Commvault Premium support.

Description	SKU

R6Y63AAE

Step 6 – Backup and Recovery for Non-Virtual and File per OI

HPE Solutions with Commvault Backup and Recovery for Non-Virtual per OI consists of all the software required to conduct backup and recovery activities on non-virtualized systems, such as physical Application or File servers, NAS Devices, and Cloud File repositories with additional features included for archive, operational reporting, and hardware snapshot management, commonly known as HPE Solutions with Commvault IntelliSnap® technology. Does not include Mailbox Granular Level backup/archive or Endpoint Protection, which must be added on a per-user license basis.

An Operating Instance is defined as any physical operating environment with a distinct server name or identity that has a HPE Solutions with Commvault intelligent Data Agent (Ida) configured to capture data from it. Physical Servers are any Server or NAS Entity that is not running a HPE Solutions with Commvault-recognized Hypervisor.

Notes: Capped Operating Instance licensing is limited to protecting up to 500GB on a given server or entity. If more than 500GB of data is protected, an additional OI license will be consumed for each additional 500GB increment.

Configuration Information

Step 6a – Backup and Recovery for Non-Virtual and File per OI Subscriptions

1, 3 & 5 Year Subscription Licenses; pricing listed for total term of the subscription; can be renewed at the end of the commitment period.

Notes: Subscription LTUs include 24X7 HPE Solutions with Commvault Premium support.

---	----------

Step 7 – Backup and Recovery for Non-Virtual File and Object Data per TB

HPE Solutions with Commvault Backup and Recovery for Non-Virtual File and Object storage consists of all the tools needed to backup a limited set of data types, such as unstructured File Systems, NAS, Cloud Storage Repositories, and Object Storage. Rights to protect structured databases (such as SQL, Oracle, etc) are excluded from this package. Additional features included for archive, operational reporting, and hardware snapshot management, commonly known as HPE Solutions with Commvault IntelliSnap® technology. Does not include Mailbox Granular Level backup/archive or Endpoint Protection, which must be added on a per-user license basis. This package may be used in conjunction with the more encompassing Non-Virtual TB Packaging to provide a complete solution for both Applications/Databases as well as unstructured file data.

Step 7a – Backup and Recovery for Non-Virtual File and Object Data per TB Subscriptions

1, 3 & 5 Year Subscription Licenses; pricing listed for the total term of the subscription; can be renewed at the end of the commitment period.

Commvault Backup and Recovery for Virtual Machines per VM 10-pack 1-month Maintenance	R6Y73AAE
---	----------

Step 9 – Backup and Recovery for Mail and Cloud Applications per User

Backup and Recovery for Mail and Cloud per User consists of all software required to protect the leading mail and user productivity platforms. Each user and application combination will be considered a unique user. For instance, a user that has their Office365 data and their Salesforce.com data protected would require two user licenses. One for each User/Application combination.

Notes: Licenses are per User

Step 9a – Backup and Recovery for Mail and Cloud Applications per User Subscriptions

Backup and Recovery for Mail and Cloud per User Subscriptions

R6Y68AAE

Step 10 – Backup and Recovery for Endpoints per User

Backup and Recovery for Endpoints per User consists of all software required to protect desktops and laptops, with end-user self service additionally being provided. Additional features used for securing the device and its data are also covered under this license package. In order for this licensing to be engaged, an end-user account must be assigned to the targeted device(s). If no user is assigned, licensing will revert to per TB or OI licensing.

Notes: Licenses are per Endpoint User

Step 10a – Backup and Recovery for Endpoints per User Subscriptions

Notes:

- 1, 3 & 5 year Subscriptions; can be renewed at the end of the commitment period.

Step 18 – Risk Analysis, Threat Scan and Security Bundle Subscriptions

HPE Solutions with Commvault Risk Analysis comprises of an ML-powered data identification solution to de-risk customer backups. It reduces risks by quarantining and deleting sensitive data where it doesn't belong, and enabling access control on sensitive data.

HPE Solutions with Threat Scan brings a Threat analysis solution that optimizes and simplifies ransomware recovery objectives, enabling businesses to recover uninfected versions of backup data and eliminating the risk of reinfecting targets with malware.

HPE Solutions with Security Bundle Subscription combines the Risk Analysis and Threat Scan Subscriptions into one bundled offering.

Step 18a – Risk Analysis for Endpoint, Non-Virtual and File, Virtual Machines and for Mail and Cloud Applications

Applications

Notes:

Step 21 – Air Gap Protect Subscriptions

HPE Solutions with Commvault Air Gap Protect delivers secure, air-gapped cloud storage for data backups. When deployed with Commvault SaaS hybrid cloud offerings, customers can get streamlined single vendor management with no need for additional cloud skills and expertise. It delivers simplified cyber resilience with pre-configured networking and storage, reduced costs via efficient deduplication and no egress fees, and ransomware mitigation with secure air-gapped cloud data protection.

Configuration Information

Step 22 – Cleanroom Recovery Subscriptions

Cleanroom Recovery is an offering for both software and SaaS customers. Cleanroom Recovery facilitates automated recovery of the control plane, integration with a tertiary copy of data in Air-gap Protect, and a streamlined, easy-to-use recovery wizard. This will provide the ability for clean and easy restores in a new uncontaminated Microsoft Azure tenant.

Notes: Both licenses below are annual term subscriptions

Commvault Cloud Clean Room Recovery SaaS with Recovery Group per 10TB E-LTU	S4V57AAE

Step 23 – HyperScale™ X Reference Architecture 4-drive Node

HPE Solutions with Commvault HyperScale™ X Software for RA is a simple and flexible way to implement HPE Solutions with Commvault HyperScale™ Technology into both new and existing HPE Solutions with Commvault environments. HyperScale X is licensed as an add-on to the HPE Solutions with Commvault software portfolio, providing the flexibility to choose the licensing model that best fits your organization's needs. HPE Solutions with Commvault HyperScale™ X Software can be acquired either as perpetual or as subscription licensing. However, rather than being licensed on usable capacity, new HPE Solutions with Commvault HyperScale™ X Software is licensed per node based on the physical data drive count in the storage server.

HPE Solutions with Commvault HyperScale™ X Software is installed initially as a three-node solution with capacity added in single node or multi-node increments. Adding nodes to an existing deployment requires additional per node licensing in the same increments. HPE Solutions with Commvault HyperScale™ X Software per node licensing is consistent regardless of drive size used in the node.

Step 23a – HPE Server Configuration for HyperScale™ X

The recommended 4-drive HPE ProLiant DL360 based server configuration has been set up (with validated default options), as a pre-defined menu, in OCA, under Storage>HPE Complete Solutions.

If the pre-defined configuration above does not meet the customer use case, the HPE ProLiant DL360 based server configurations should be built via the HPE ordering (OCA) tool, using the BoM guidelines for HPE Solutions with Commvault HyperScale X validated 4-drive HPE server configurations, provided in this document:

<https://h20195.www2.hpe.com/v2/Getdocument.aspx?docname=a00060014enw&skiphtml=1>

Step 23b – HyperScale™ X Reference Architecture 4-drive Node Subscriptions

1-5 year subscription license, which can be renewed at the end of the term. If not renewed, software will enter into a read/recover-only state where no new backups can be executed. May be added to any existing or new HPE Solutions with Commvault deployment, however HPE Solutions with Commvault HyperScale™ X Software will not function without other HPE Solutions with Commvault Complete Data Protection licensing present.

Notes: Subscription LTUs include 24X7 HPE Solutions with Commvault Premium support.

Description	SKU
Commvault HyperScale X 4-drive Node per Node 1-year Subscription E-LTU	R8S99AAE
Commvault HyperScale X 4-drive Node per Node 2-year Subscription E-LTU	R8T00AAE

Step 24 – HyperScale™ X Reference Architecture 12-drive Node

HPE Solutions with Commvault HyperScale™ X Software RA is a simple and flexible way to implement HPE Solutions with Commvault HyperScale™ Technology into both new and existing HPE Solutions with Commvault environments. HyperScale X is licensed as an add-on to the HPE Solutions with Commvault software portfolio, providing the flexibility to choose the licensing model that best fits your organization's needs. HPE Solutions with Commvault HyperScale™ X Software can be acquired either as perpetual or as subscription licensing. However, rather than being licensed on usable capacity, new HPE Solutions with Commvault HyperScale™ X Software is licensed per node based on the physical data drive count in the storage server.

HPE Solutions with Commvault HyperScale™ X Software is installed initially as a three-node solution with capacity added in single node or multi-node increments. Adding nodes to an existing deployment requires additional per node licensing in the same increments. HPE Solutions with Commvault HyperScale™ X Software per node licensing is consistent regardless of drive size used in the node.

Step 24a – HPE Server Configuration for HyperScale™ X

The recommended 12-drive HPE ProLiant DL380 Gen10 Plus based server configuration has been set up (with validated default options), as a pre-defined menu, in OCA, led by SKU S0R45A under Storage>HPE Complete Solutions.

The recommended 12-drive HPE ProLiant DL380 Gen11 based server configuration has been set up (with validated default options), as a pre-defined menu, in OCA, led by SKU S4A16AAE under Storage>HPE Complete Solutions.

If the pre-defined configuration above does not meet the customer use case, the HPE ProLiant DL380 based server configurations should be built via the HPE ordering (OCA) tool, using the BoM guidelines for HPE Solutions with Commvault HyperScale X validated 12-drive HPE server configurations, provided in this document:

<https://h20195.www2.hpe.com/v2/Getdocument.aspx?docname=a00060014enw&skiphtml=1>

Notes: The recommended ambient temperature for the HPE ProLiant DL380 based server configuration is up to 30C

Step 24b – HyperScale™ X Reference Architecture 12-drive Node Subscriptions

1-5 year subscription license, which can be renewed at the end of the term. If not renewed, software will enter into a read/recover-only state where no new backups can be executed. May be added to any existing or new HPE Solutions with Commvault deployment, however HPE Solutions with Commvault HyperScale™ X Software will not function without other HPE Solutions with Commvault Complete Data Protection licensing present.

Notes: Subscription LTUs include 24x7 HPE Solutions with Commvault Premium support.

Configuration Information

Step 24c – HyperScale™ X Reference Architecture 12-drive Node Perpetual License

Notes: Perpetual License; requires minimum of 12 months maintenance and support with initial purchase.

Description

Commvault HyperScale X 12-drive Node per Node Perpetual E-LTU

SKU

R7K49AAE

Step 24d – HyperScale™ X Reference Architecture 12-drive Node Perpetual Maintenance

HPE Solutions with Commvault HyperScale™ X software maintenance and support per Back End TB. Minimum commitment of 12 months maintenance and support with initial purchase. Maintenance is listed in a monthly rate.

Commvault HyperScale X 12-drive Node per Node 1-month Maintenance

R7K50AAE

Step 25 – HyperScale™ X Reference Architecture 24-drive Node

HPE Solutions with Commvault HyperScale™ X Software for RA is a simple and flexible way to implement HPE Solutions with Commvault HyperScale™ Technology into both new and existing HPE Solutions with Commvault environments. HyperScale X is licensed as an add-on to the HPE Solutions with Commvault software portfolio, providing the flexibility to choose the licensing model that best fits your organization's needs. HPE Solutions with Commvault HyperScale™ X Software can be acquired either as perpetual or as subscription licensing. However, rather than being licensed on usable capacity, new HPE Solutions with Commvault HyperScale™ X Software is licensed per node based on the physical data drive count in the storage server.

HPE Solutions with Commvault HyperScale™ X Software is installed initially as a three-node solution with capacity added in single node or multi-node increments. Adding nodes to an existing deployment requires additional per node licensing in the same increments. HPE Solutions with Commvault HyperScale™ X Software per node licensing is consistent regardless of drive size used in the node.

Step 25a – HPE Server Configuration for HyperScale™ X

The recommended 24-drive HPE Apollo 4200 based server configuration has been set up (with validated default options), as a pre-defined menu, in OCA, led by SKU S3P74AAE under Storage>HPE Complete Solutions.

If the pre-defined configuration above does not meet the customer use case, the HPE Apollo 4200 based server configurations should be built via the HPE ordering (OCA) tool, using the BoM guidelines for HPE Solutions with Commvault HyperScale X validated 24-drive HPE server configurations, provided in this document:

<https://h20195.www2.hpe.com/v2/Getdocument.aspx?docname=a00060014enw&skiphtml=1>

Step 25b – HyperScale™ X Reference Architecture 24-drive Node Subscriptions

1-5 year subscription license, which can be renewed at the end of the term. If not renewed, software will enter into a read/recover-only state where no new backups can be executed. May be added to any existing or new HPE Solutions with Commvault deployment, however HPE Solutions with Commvault HyperScale™ X Software will not function without other HPE Solutions with Commvault Complete Data Protection licensing present.

Notes: Subscription LTUs include 24X7 HPE Solutions with Commvault Premium support.

Step 26b – HPE Services – Advisory & Professional Commvault Services (optional)

Businesses today require 24x7 access to data, efficient data management, and minimization of downtime or data loss. Consultants from HPE Services provide a global delivery capability to help reduce the time, complexity, and risk during your Commvault backup software implementation. HPE A&PS Deployment Services for Commvault is designed to provide an integrated Commvault data protection solution.

The service implements Commvault Complete Backup & Recovery software or Commvault HyperScale software by leveraging the HPE best practices to expedite the deployment and integration process while delivering an optimum solution. It provides consultative services to install, configure, integrate, and upgrade Commvault software within your environment based on your backup requirements. These are fixed-scope, fixed-priced services with multiple deployment options.

Step 28 – Choose HPE Server Nodes (optional)

Select HPE Server for HPE Solutions with Commvault Software to run on (optional)

For installations that require a server to load and run the HPE Solutions with Commvault software on; HPE has created an, easy to order, optimized hardware bundle for use with the HPE Solutions with Commvault software.

Notes:

- Please create the HW configuration per the guidance provided in these Configuration guides:
HyperScale: <https://h20195.www2.hpe.com/v2/Getdocument.aspx?docname=a00060014enw>
- The HPE Solutions with Commvault software is server agnostic and is supported on all HPE Server platforms. However, it is critical that the selected server platform is configured to meet the specifications provided by HPE Solutions with Commvault. Here are links to HPE Solutions with Commvault's hardware requirements

Step 29 – HPE Solutions with Commvault Metallic Backup as a service

Step 29a – HPE Solutions with Commvault Metallic Dynamics Backup and Recovery (BUR) Essentials Edition

Notes: The tiers represents the number of MS Dynamics users that require Metallic BUR Essentials, per year.

The tiering limits have been provided in the table below

Description	SKU
Commvault Metallic Dynamics Backup and Recovery Essentials Tier A 1-year Subscription E-LTU	R8T27AAE
Commvault Metallic Dynamics Backup and Recovery Essentials Tier B 1-year Subscription E-LTU	R8T28AAE
Commvault Metallic Dynamics Backup and Recovery Essentials Tier C 1-year Subscription E-LTU	R8T29AAE
Commvault Metallic Dynamics Backup and Recovery Essentials Tier D 1-year Subscription E-LTU	R8T30AAE

Tier type	Minimum number of users	Maximum number of users
Tier A	1	749
Tier B	750	2499
Tier C	2500	4999
Tier D	5000	1000000

Step 29b – HPE Solutions with Commvault Metallic Database Backup and Recovery

Notes: The tiers represents the Database Front-End TBs that require Metallic BUR, per year.

The tiering limits have been provided in the table below

Commvault Metallic Database Backup and Recovery Tier A 1-year Subscription E-LTU	R8T31AAE
Commvault Metallic Database Backup and Recovery Tier B 1-year Subscription E-LTU	R8T32AAE
Commvault Metallic Database Backup and Recovery Tier C 1-year Subscription E-LTU	R8T33AAE
Commvault Metallic Database Backup and Recovery Tier D 1-year Subscription E-LTU	R8T34AAE

Tier type	Minimum Front-End TBs	Maximum Front-End TBs
Tier A	1	49
Tier B	50	199
Tier C	200	999
Tier D	1000	1000000

Step 29c – HPE Solutions with Commvault Metallic Endpoint Backup and Recovery eDiscovery Edition

Notes: The tiers represents the number of Endpoint users that require Metallic BUR, per year.

The tiering limits have been provided in the table below

Commvault Metallic Endpoint Backup and Recovery eDiscovery Tier A 1-year Subscription E-LTU	R8T35AAE
Commvault Metallic Endpoint Backup and Recovery eDiscovery Tier B 1-year Subscription E-LTU	R8T36AAE
Commvault Metallic Endpoint Backup and Recovery eDiscovery Tier C 1-year Subscription E-LTU	R8T37AAE
Commvault Metallic Endpoint Backup and Recovery eDiscovery Tier D 1-year Subscription E-LTU	R8T38AAE
Commvault Metallic Endpoint Extended Retention per User 1-year Subscription E-LTU	R8T39AAE

Tier type	Minimum number of users	Maximum number of users
Tier A	1	749
Tier B	750	2499
Tier C	2500	4999
Tier D	5000	1000000

Configuration Information

Step 29d – HPE Solutions with Commvault Metallic Endpoint Step-up from Essentials to eDiscovery

Notes: The tiers represents the number of Endpoint users that require a step up from Metallic BUR Essentials to eDiscovery, per year. The tiering limits have been provided in the table below

Description	SKU
Commvault Metallic Endpoint Essentials to eDiscovery Tier A 1-year Subscription E-LTU	R8T40AAE
Commvault Metallic Endpoint Essentials to eDiscovery Tier B 1-year Subscription E-LTU	R8T41AAE
Commvault Metallic Endpoint Essentials to eDiscovery Tier C 1-year Subscription E-LTU	R8T42AAE
Commvault Metallic Endpoint Essentials to eDiscovery Tier D 1-year Subscription E-LTU	R8T43AAE
Commvault Metallic Endpoint Backup and Recovery Essentials 5-year Subscription E-LTU (Per User)	S4V63AAE

Tier type	Minimum number of users	Maximum number of users
Tier A	1	749
Tier B	750	2499
Tier C	2500	4999
Tier D	5000	1000000

Step 29e – HPE Solutions with Commvault Metallic Endpoint Backup and Recovery Essentials Edition

Notes: The tiers represents the number of Endpoint users that require Metallic BUR, per year. The tiering limits have been provided in the table below

Commvault Metallic Endpoint Backup and Recovery Essentials Tier A 1-year Subscription E-LTU	R8T44AAE
Commvault Metallic Endpoint Backup and Recovery Essentials Tier B 1-year Subscription E-LTU	R8T45AAE
Commvault Metallic Endpoint Backup and Recovery Essentials Tier C 1-year Subscription E-LTU	R8T46AAE
Commvault Metallic Endpoint Backup and Recovery Essentials Tier D 1-year Subscription E-LTU	R8T47AAE

Tier type	Minimum number of users	Maximum number of users
Tier A	1	749
Tier B	750	2499
Tier C	2500	4999
Tier D	5000	1000000

Step 29f – HPE Solutions with Commvault Metallic File and Object Backup

Notes: The tiers represents the File and Object Front-End TBs that require Metallic BUR, per year. The tiering limits have been provided in the table below

Commvault Metallic File and Object Backup Tier A 1-year Subscription E-LTU	R8T48AAE
Commvault Metallic File and Object Backup Tier B 1-year Subscription E-LTU	R8T49AAE
Commvault Metallic File and Object Backup Tier C 1-year Subscription E-LTU	R8T50AAE
Commvault Metallic File and Object Backup Tier D 1-year Subscription E-LTU	R8T51AAE

Tier type	Minimum Front-End TBs	Maximum Front-End TBs
Tier A	1	49
Tier B	50	199
Tier C	200	999
Tier D	1000	1000000

Configuration Information

Step 29g – HPE Solutions with Commvault Metallic Microsoft 365 Backup and Recovery (BUR)

Notes: The SKUs represent the Metallic BUR for MS Office 365 per user, per year.

Description

SKU

Commvault Metallic Microsoft 365 Backup Standard 5GB per User 1-year E-LTU	S2C52AAE

Step 29h – HPE Solutions with Commvault Metallic VM and Kubernetes Backup

Notes: The tiers represents the number of VM 10-packs that require Metallic BUR, per year.

The tiering limits have been provided in the table below

Metallic VM & Kubernetes Standard Backup delivers snapshot backup and restore for your full VMs, on-premises or in the cloud.

Commvault Metallic VM/Kubernetes Standard Backup per 10 VM Tier A 1-year Subscription E-LTU	S1H07AAE
Commvault Metallic VM/Kubernetes Standard Backup per 10 VM Tier B 1-year Subscription E-LTU	S1H08AAE
Commvault Metallic VM/Kubernetes Standard Backup per 10 VM Tier C 1-year Subscription E-LTU	S1H09AAE
Commvault Metallic VM/Kubernetes Standard Backup per 10 VM Tier D 1-year Subscription E-LTU	S1H10AAE

Metallic VM & Kubernetes Advanced and Enterprise Backup delivers application backup for file systems and enterprise database applications running in virtual machines, on-prem or in the cloud.

Metallic VM & Kubernetes Enterprise

Description

SKU

Commvault Metallic VM/Kubernetes Enterprise Backup per VM Tier A 1-year Subscription E-LTU	S1H03AAE

Commvault Cloud Government Backup and Recovery SaaS for Kubernetes per Front End TB Monthly E-LTU	S4M73AAE

Notes: The Commvault Cloud Government licenses above are designed for Fed customers that rely on the Government Cloud.

Step 29i – HPE Solutions with Commvault Metallic Salesforce Backup and Recovery (BUR)

Notes: The tiers represents the number of Salesforce users that require Metallic BUR Essentials, per year.

The tiering limits have been provided in the table below

Commvault Metallic Salesforce Backup and Recovery Tier A 1-year Subscription E-LTU	R8U45AAE
Commvault Metallic Salesforce Backup and Recovery Tier B 1-year Subscription E-LTU	R8U46AAE
Commvault Metallic Salesforce Backup and Recovery Tier C 1-year Subscription E-LTU	R8U47AAE
Commvault Metallic Salesforce Backup and Recovery Tier D 1-year Subscription E-LTU	R8U48AAE

Tier type	Minimum number of users	Maximum number of users
Tier A	1	749
Tier B	750	2499
Tier C	2500	4999
Tier D	5000	1000000

Step 29j – HPE Solutions with Commvault Metallic File and Object Archive

Notes: The tiers represent the Metallic File and Object Archive for 100TB units, per year. The tiering limits have been provided in the table below

Commvault Metallic File and Object Archive Tier A per 100TB 1-year E-LTU	S2U52AAE
Commvault Metallic File and Object Archive Tier B per 100TB 1-year E-LTU	S2U53AAE
Commvault Metallic File and Object Archive Tier C per 100TB 1-year E-LTU	S2U54AAE
Commvault Metallic File and Object Archive Tier D per 100TB 1-year E-LTU	S2U55AAE

Tier type	Minimum number of users	Maximum number of users
Tier A	1	4
Tier B	5	9
Tier C	10	19
Tier D	20+	

Step 29k – HPE Solutions with Commvault Metallic ThreatWise

Notes: The tiers represent the Metallic ThreatWise per 10 sensors, per year. The tiering limits have been provided in the table below

Commvault Metallic ThreatWise Tier A per 10 Sensors 1-year E-LTU	S2U56AAE
Commvault Metallic ThreatWise Tier B per 10 Sensors 1-year E-LTU	S2U57AAE
Commvault Metallic ThreatWise Tier C per 10 Sensors 1-year E-LTU	S2U58AAE
Commvault Metallic ThreatWise Tier D per 10 Sensors 1-year E-LTU	S2U59AAE

Configuration Information

Tier type	Minimum number of users	Maximum number of users
Tier A	10	40
Tier B	50	190
Tier C	200	990
Tier D	1000+	

Step 29l – HPE Solutions with Commvault Cloud Active Directory Backup and Recovery (BUR) SaaS

Notes: The SKU represents the number of Active Directory users that require BUR SaaS, per year

Description

SKU

Commvault Cloud Backup and Recovery SaaS for Active Directory per User 1yr Upfront Subscription E-LTU

S3S89AAE

Step 29m – HPE Solutions with Commvault Cloud Threat Scan SaaS

Notes: The SKU below represents the number of front-end TBs that require Threat Scan SaaS, per year
